## May Day Is Date Set for Demonstration Throughout Holland

By The Associated Press  
ROTTERDAM, April 29.—May day promises to prove one of the most important days of the year in Holland. The people are planning to make the day a day of peace and brotherhood, where the workers plan to indulge in some demonstrations against the employers. The Amsterdam experts, where the day is observed, has issued orders to make the townships with flags and all manner of other red deorations.

Holland, like most of Europe, is the scene of a movement of pacification and unionism, and the demonstration against the employers is to be followed by a series of free meetings with the people.

That will be the scene of the London demonstration expected to bring together thousands of workers and their families in the streets.

Reports of a revolutionary demonstration in Holland have filtered through, but they may be false.

The means of collecting the tax

as explained last night, will be the addition of the amount of tax upon the selling price of the article taxed.

It is the intention of the tax to help the merchant in order to keep him in business.

He will be able to buy his goods

at a lower price than he can sell them.

Mrs. Glenn was surrounded by

friends who were trying to comfort

her when a reporter for The World called last night.

Her little home, white-washed, shows how hard her mother had to work for herself

and how she had to support herself

when her husband was away.

She told the reporter that she had

not been able to get a job since

she had to leave France to help hold back the Hun hordes.

Between jobs, she told as best she could the story of her little boy's death.

Having a few spare moments

at noon she thought she would walk

part of the way to school with Everett. He was holding my hand

as we walked along toward the

train wrecks in France.
